

Shopify Order Connection

CREATING A PROVIDE APP IN SHOPIFY TO GIVE PRINSTANT ACCESS TO PULL ORDERS DIRECTLY FROM YOUR SITE

STEP 1

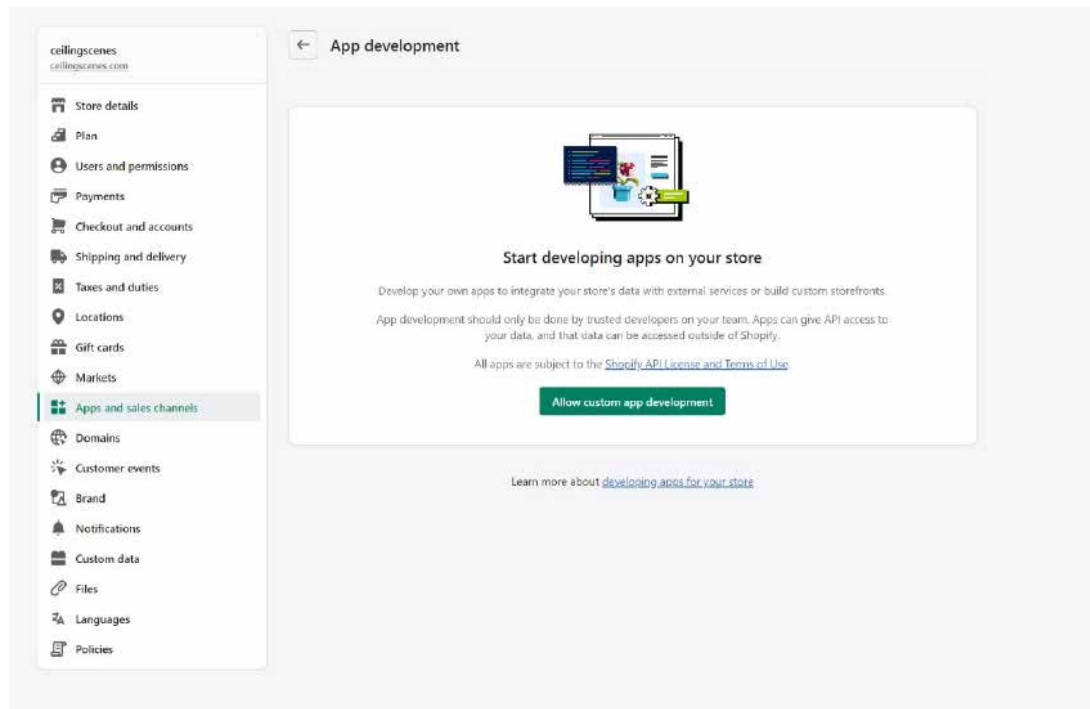

Go to the Apps and sales channels within your Shopify Store.

A screenshot of the Shopify Admin interface, specifically the 'Apps and sales channels' section. The left sidebar shows the 'Apps and sales channels' menu item highlighted. The main content area displays a list of 10 installed apps and sales channels. The list includes 'Blocky: Fraud Country Blocker', 'Fraud Filter', 'Online Store • Sales channel', 'Google • Sales channel', 'Pinterest • Sales channel', 'Printful: Print on Demand', 'eBay • Sales channel', 'Microsoft Channel • Sales channel', 'ShipStation', and 'Zakeke Product Customiser 2D3D'. Each app entry has 'Uninstall' and 'Get support' links. A 'Sort by Newest first' dropdown is visible. The top right of the page shows 'Develop apps' and 'Shopify App Store' buttons. The bottom of the page has a link to 'Learn more about apps'.

← App development

Create a custom app

Integrate your store's data with external services or build a custom storefront. Apps are subject to the [Shopify API License and Terms of Use](#).

Create an app

Develop apps with caution

All apps are subject to the [Shopify API License and Terms of Use](#). In addition, you should not use apps to customize checkout.

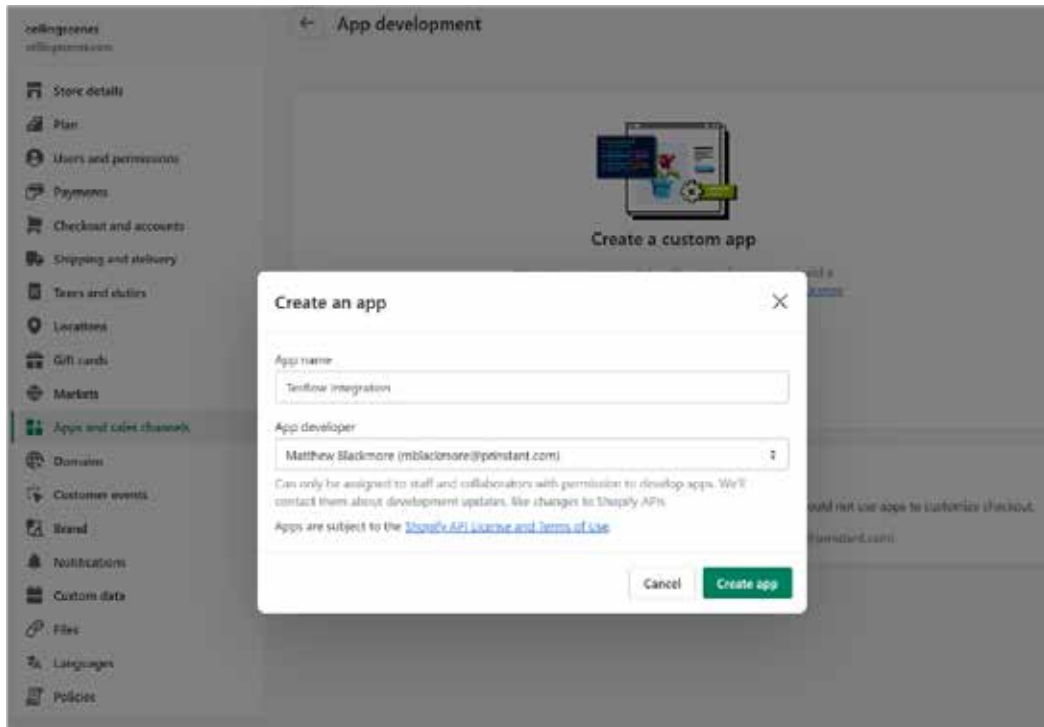

App development allowed on March 06, 2023 by Matthew Blackmore (mblackmore@prinstant.com).

Learn more about [custom apps](#)

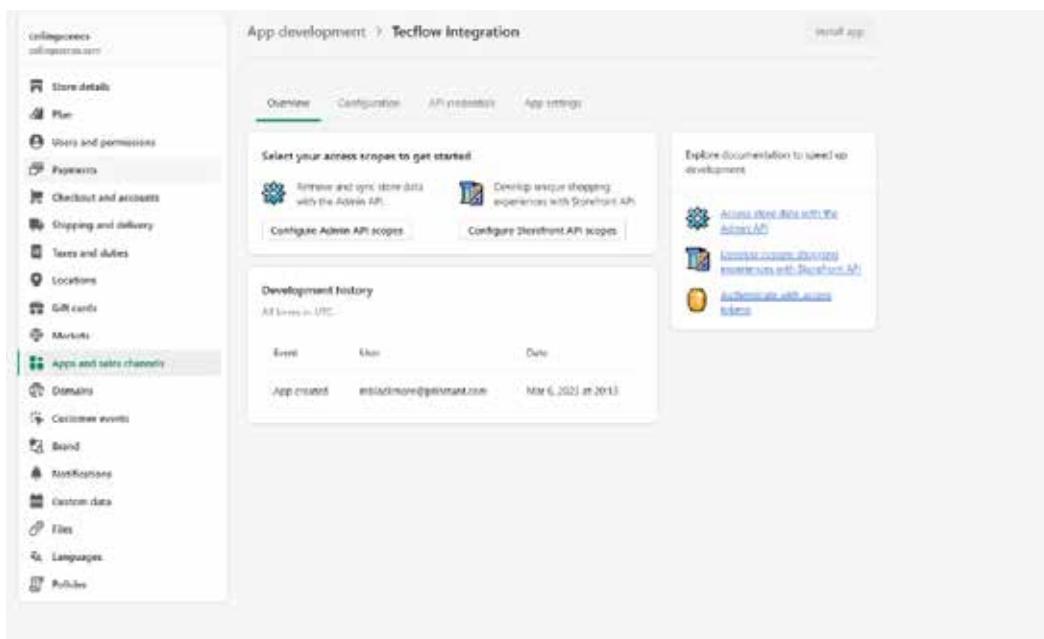

STEP 5

Enter an app name of Tecflow Integration and choose the App Developer name of one of your store's logins. Click "Create App".

STEP 6

STEP 7

Go to configuration and check the boxes next to “write_orders” & “read_orders”

Run demo queries with Shopify's GraphQL App

STEP 8 Click “Install App”

The screenshot shows the 'App development > Tecflow Integration' page in the Prinstant admin interface. The left sidebar lists various store settings, with 'Apps and sales channels' highlighted. The main content area has tabs for 'Overview', 'Configuration', 'API credentials', and 'App settings'. The 'API credentials' tab is active, showing an 'Access tokens' section with a message: 'You don't have any access tokens yet. To get your Admin API access token, install your app.' Below this message is a green 'Install app' button. To the right, there are links for 'Authenticate with access tokens', 'Start using the Admin API', and 'Start using the Storefront API'. Below the 'Access tokens' section is an 'API key and secret key' section showing the API key 'ab933b8793abfa2736830b9cb720b60' and a masked API secret key. A note at the bottom says 'Created Mar 6, 2023 at 20:13 UTC'.

STEP 9

Click “reveal token once” under the Admin API access token section and send an email to Dan Petersen (dpetersen@prinstant.com) with the resulting access token and the url for your Shopify store.

The screenshot shows the same 'App development > Tecflow Integration' page, but now the 'API credentials' tab shows an 'Admin API access token' section. The message reads: 'To protect your data, you'll only be able to reveal your Admin API token once. Copy and save your Admin API access token in a secure place.' Below this is a field with a masked token and a 'Reveal token once' button. To the right, the same links for authentication and API usage are present. The 'API key and secret key' section remains the same, with the API key 'ab933b8793abfa2736830b9cb720b60' and a masked secret key. A note at the bottom says 'Created Mar 6, 2023 at 20:15 UTC'. The 'Uninstall app' button is now visible in the top right corner.
